OBJECTIVE

Actively seeking opportunities to apply my skills in web development, machine learning, data science and cybersecurity in a real-world setting.

SKILLS

- Data Structures & Algorithms
- C
- Python
- MySql
- HTML/CSS
- JavaScript/php
- Adobe Photoshop/Premiere pro

PERSONAL PROJECTS

IoT Enabled Sleep Detection Sunglass
Using Aurdino Uno, sensors etc.
- Developed a device to detect driver drowsiness and prevent accidents by buzzing or applying brakes automatically when the driver falls asleep.

Event Management Website
Using HTML, CSS, JavaScript, php etc.
- An event management website streamlines planning, registration, and communication for various events, providing tools for scheduling, guest management, marketing, and analytics. It enhances efficiency and attendee satisfaction with a centralized, user-friendly platform.

WORK EXPERIENCE

Cyber Security 11/2023 - 12/2023
TecCera Innovations
- Understanding the evolving landscape of cyber crime, including ransomware, phishing, DOS(Deniel of Service) and hands-on experience with tools like Wireshark and Nmap.

Web Development 11/2022 - 12/2022
Global Technologies
- Developed an interactive restaurant finder website using HTML, CSS, JavaScript, and PHP. Integrated Google Maps API for location and review features.
